Dear Alumni,

“A tree is known by the fruits it bears, so an institution is known by its students.”

With great enthusiasm, BCET Gurdaspur, Premier Engineering Institution of North India, welcome its alumni member's world over. Every year, over four hundred graduates join the ranks of thousands of alumni who have graduated over the past nine years. This way BCET has created world class technocrats who have done both their Alma mater and India proud by doing pioneering work in diverse fields of engineering and technology.

As BCET graduate, you now have access to the range of services, programs, networking opportunities and friendships with the grace of God. We, here at BCET, value and invite your words of wisdom, professional knowledge and career advice to the younger going to be graduates. There is always something more, which the fresher can learn from the practical experience of their seniors.

Dear alumni, you are our life long assets to bank upon for further growth of the institution. I would like to take this opportunity to invite your familial attention to the cause of students presently studying here. Surely, Training and placement is an area where enough scope exists for you to pay back to the institution which has nourished you. You might recall that the students have to undergo six months industrial training in 7th /8th semester and a helping hand in this regard from your side can create the fortunes for another BCETian. **On behalf of the present students of the college, I request you to contribute to the life and growth of your institute by helping us in our training and placement efforts.**

Hoping for a favorable reply,

(Ashok Kr. Chalotra)
